The goal of this section is to introduce the participants to the equipment and techniques necessary to perform both procedures. The lecture will present indications, proper patient selection and follow-up care in patients. Case examples will be used to elaborate. A hands-on lab will follow in which participants will have opportunity to familiarize themselves with the equipment & practice using the stents in a dry-lab setting.

Following completion of the course, attendees will feel confident with both procedures & have an understanding of their various applications.
